Solve the Riddle

The Mysterious Creature

I was walking through the forest.

The trees were tall and dark

In the distance, I heard a strange noise

A loud screeching.

The sound grew louder as I got closer it felt like something was following me but I couldn't see anything.

I stopped.

Something was moving in the bushes.

Behind me, a branch snapped.

Ran away as fast as I could.

I tripped over a rock and fell, but I got up quickly I knew I had to keep running the creature was close.

Then, all of a sudden, the noise stopped.

I turned around. Nothing there. Just the trees and the wind.

What had been chasing me? What could it have been?

What creature moves silently, but always leaves people guessing?
